

# COMPANY OVERVIEW | 2024

*Edition 2*

# West-Trak®

## UNRIVALLED STRENGTH

*Delivering the solutions you need to stay productive*

# FAST FACTS

 **30+ Years**  
Industry Experience

 **Nationwide**  
Sales, Service & Support

 **Parts**  
For over 5000 Models

 **95% of Orders**  
Dispatched within 24 hrs

 **1500+ Tonnes**  
Of Undercarriage Parts

 **400+ Tonnes**  
Of Ground Engaging Tools

 **400+ Tonnes**  
Of Steel Plate & Profiles

 **50,000+**  
Plans & Drawings

## MINING

We know wear – every hour of downtime means an impact on your productivity & profit. Our mining solutions ensure increased uptime & better performance from your front line machines.

## QUARRYING

High wear & tear environments can grind your machines to pieces. Armour up & protect your assets with our tough steel solutions, to get longer service life & reduced downtime.

## FORESTRY

When you're miles away in the back blocks tracking, cutting & hauling logs, your machinery has to stay productive. Our range of forestry products & services will help you stick to the slopes & get more done.

## CIVIL CONSTRUCTION

When you're hard at work building infrastructure the economy relies on, we'll keep your machines moving with unrivalled parts, service & back-up support you can rely on.

## ENGINEERING

Fixing break downs fast & finding the right parts for your maintenance or fabrication projects can be extremely challenging. Our huge range of heavy wear steel products will help you deliver on time, every time.

# OUR CAPABILITIES & SERVICES

## CNC Profile Cutting

We provide our customers with the fastest steel plate processing lead times in the industry! You'll get fast, reliable & solid service from our experienced plate processing experts who are crazy about keeping your machines up & running.

## Drawing & Design

Our team of experienced mechanical design engineers & CAD drawing experts use the latest software to design customised wear parts & structures to suit your needs. We can convert your hand drawn sketches or cardboard templates into fully scaled 2D or 3D working drawings.

## Machining & Lineboring

With a large machine shop & years of fitter turning experience, we offer all the machining services you need! Our engineers are master craftsmen, skilled in fitting, turning, welding, tool making & mechanical problem-solving.

## Rolling & Pressing

Rely on our years of heavy engineering experience to supply the best brands & highest quality steel plate, rolled, bent, curved or pressed to your required shape. As direct importers, stockists & processors of wear steels, we can form the hard stuff for any application.

## Track Group Bolt-ups

Stay on Track for longer with less hassle, less downtime! We make it easy by supplying Track Groups with your choice of shoes already bolted on so you can roll off the old and roll on the new, to keep on tracking.

## Track Wear Reporting

We know wear, we know Track Gear! We'll help you stay on track & increase uptime of your machines by monitoring & measuring the performance of your Undercarriage system. Don't get caught out with unexpected break downs & downtime.

## Track Press & Rebuilds

Rebuilding is a great way to get more from your Track Groups. Keeping your tracks properly maintained and in top working order is critical for getting the longest possible service life & return on investment.

## Welding & Fabrication

We weld the big stuff, the hard stuff & the toughest heat treated, through hardened wear steels. Our wear steel requires specialist welding methods to survive the roughest quarry, mining & forestry environments.

# UNDERCARRIAGE PARTS

## TUFF Superseal® Chains

A unique chain providing up to 30% longer life. Available for most makes & models of steel tracked excavators from 10-50 tonne.

## Dozer Undercarriage

High quality, sealed & lubricated dozer chains are available for most makes & models of bulldozers.

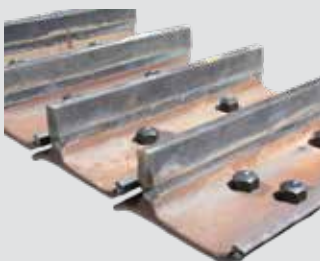

## Excavator Track Guards

High quality track guards are available from stock to suit most makes & models of excavators from 10-50 tonne.

## Track Shoes

1, 2, & 3 bar options available. Get more grip & stay safer on site with our track shoe range.

## Grouser Relug Bar

A great way to increase your machine's traction is by re-lugging your old shoes, or enhancing your new ones.

## Rollers

A large range of rollers in single & double flange are available to suit most makes & models of excavators, dozers & other tracked machinery.

## Sprockets & Idlers

A large range of sprockets & idlers are available to suit most makes & models of excavators, dozers & other tracked machinery.

## Final Drives

OEM quality final drives are available for a wide range of excavators and tracked equipment from 1-30 tonne.

# BUCKETS & G.E.T

(Ground Engaging Tools)

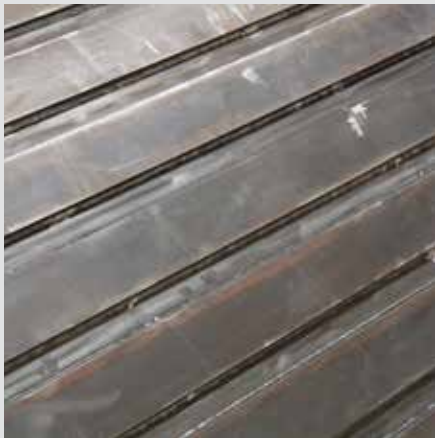

## ROCK & BULK BUCKETS

For 20T+ Excavators

- SIDE PROTECTORS
- WEAR STRIPS OR LINER PLATES
- LIP PROTECTORS
- BUCKET TEETH & ADAPTERS
- CUTTING EDGES
- CHOCK BLOCKS
- HEEL SHROUDS
- OUTSIDE WEAR STRIPS

# BUCKET & BLADE PROTECTION

**WEAR STRIPS**

**HEEL SHROUDS**

**CHOCK BLOCK WEAR STRIPS**

**MTG PROMET LIP PROTECTORS**

**MTG PROMET SIDE PROTECTORS**

**WELD-ON LIP PROTECTORS**

# STEEL PLATE APPLICATIONS

G350, G450, G500, and G780 grades, available in a range of thicknesses

**CUSTOM LINING PLATES**

**TROMMEL PARTS**

**BOLT ON LINING PLATES**

**A.R.M HARDFACING PLATES**

## LINERS

**DOZER BLADES**

**EXCAVATOR BUCKETS**

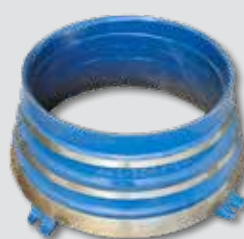

**HAUL TRUCK TRAYS**

**LOADER BUCKETS**

## CRUSHER PARTS

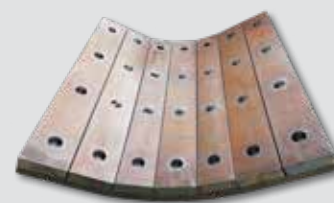

**CONE CRUSHERS**

**JAW CRUSHERS**

**HAMMER MILLS**

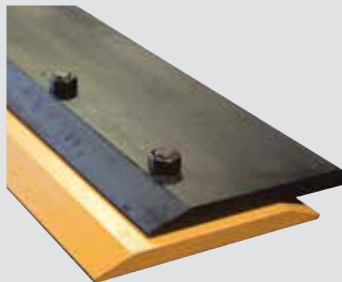

**IMPACT CRUSHERS**

# CUTTING EDGES & END BITS

## Cutting Edge Profiles

Single bevel, half arrow, and double bevel profile options are available to suit all types of buckets and blades.

## Excavator Cutting Edges

Cut through the clutter, make your bucket dig easier and last longer with our bolt-on cutting edges.

## Loader Cutting Edges & End Bits

Cut through the clutter, make your bucket dig easier and last longer with a bolt-on reversible cutting edge.

## Dozer Cutting Edges & End Bits

Get more pushing power! You need high quality cutting edges that are stronger, tougher and last longer. We've got them!

## Scraper Cutting Edges & Routers

A full range of bolt-on, reversible cutting edges, routers and other wear parts are available for all makes and models of Scrapers and Scoops.

## Compactor Cutting Edges & Wear Parts

A large range of high quality bolt-on cutting edges and end bits are available for all makes and models of Wheel Compactors and wheeled Dozers.

## Grader Cutting Edges & End Bits

A full range of bolt-on cutting edges and end bits are available to suit most makes and models of Graders and Snowplows.

## Plow Bolts, Nuts & Washers

From 1/2" up to 1 3/8" size, our hardened plow bolts & nuts will keep your edges secure in all conditions.

Get a grip and pull more wood with a set of Veriga tyre tracks on your Skidders & Forwarders!  
These Veriga tyre tracks will improve the productivity & performance of your machines in the most extreme working conditions.

**Single Wheel Tyre Tracks**

**Bogie Wheel Tyre Tracks**

**Connecting Links & Tensioners**

- *The link design is an asymmetric shape with 30mm longitudinal length for long wear life.*
- *All links are made from quality boron steel & heat treated by a special oil quenching process for better through-hardness & toughness.*

# FORESTRY TYRE TRACKS

# RIPPER PRODUCTS

## Wheel Tractor Rippers

Versatile in size, shape, and application, our wheel tractor rippers are available to fit all types of wheel tractor attachments and applications.

## Dozer Rippers

Supplied from stock, or custom designed to suit your application, we can supply ripper shanks and teeth for all makes and models of Dozers. Get superior penetration, strength, and wear life in any ripping application.

## Excavator Rippers

Rip into it with custom designed and engineered ripper assemblies to suit 10-100 Tonne excavators. Every ripper is precision-engineered to ensure optimal performance in the toughest conditions.

## Grader Rippers

A range of ripper shanks are available to suit all makes & models of motor graders. custom designs can be built for any application.

# RUBBER TRACKS & PADS

**Excavator Rubber Tracks**  
Our TUFFtrac range is engineered for durability and optimised performance across a vast range of thousands of excavator models.

**CTL Rubber Tracks**  
Delivering unmatched traction and durability, our TUFFtrac range is optimised for NZ conditions with endless steel cabling and maximum traction.

**MTL Rubber Tracks**  
Designed for optimal performance on multi-terrain loaders, TUFFtrac MTL tracks provide reliability even in the most demanding environments.

**Camso Rubber Tracks**  
The OEM solution for both excavators and CTLs, Camso rubber tracks are crafted for ultimate reliability in the hardest conditions.

**TUFFpad Rubber Pads**  
Made in Malaysia and complete with an industry leading 24-Month warranty, these unique pads are best suited for harsh conditions like rail work, where exceptional endurance and reliability is required.

**Bolt-on Rubber Pads**  
Designed to be mounted onto existing steel track shoes, effectively reducing surface damage and vibrations.

**Clip-on Rubber Pads**  
Suited to larger excavators and perfect for quick installation, Clip-on pads can fit to almost any steel shoe design up to 700mm wide and do not require pre-drilled bolt holes.

**Chain-on Rubber Pads**  
Chain-on Rubber Pads bolt directly to the chain of an excavator. Complete with an industry-leading 24-month warranty, these pads are generally used in extreme wear situations to maximise uptime.
